Drains installed 10116 Mich 10147 Minn

Gate installed 25243 Saddletree

Tree roots removed 25243 Saddletree

Fertilize

Notes

We finally got rain unfortunately it came down hard and with 50 plus mph winds which created two small leaks near skylights

But this also helped the grass in transition and I don't believe we will need near the sodding this year

So I'm taking bids to skin the palm trees; this is something that has taken the back burner for several years
